

THE INTERNATIONAL TRADE FAIR FOR THE ALUMINIUM SUPPLY CHAIN

5 - 7 MARCH 2025
BOLOGNAFIERE - ITALY

13th edition

INSPIRING THE FUTURE OF ALUMINIUM PROCESSING

- RAW MATERIALS • DIE CASTING • GRAVITY AND LOW-PRESSURE FOUNDRY
- EXTRUSION • ROLLING • MOULDING • FINISHING • MACHINING • RECYCLING

Follow us on   [METEF.COM](https://www.metef.com)

Project and management

In collaboration with

At the same time with

A supply chain event

FOR 25 YEARS, THE MOST IMPORTANT EVENT CREATED IN ITALY FOR TECHNOLOGIES, PROCESSING AND THE SMART USE OF ALUMINUM

Launched 25 years ago, in a historical period of tremendous growth of the world metallurgical industry, **METEF** represents in Italy the only reference point for **the aluminium industrial supply chain**: from **raw materials, primary and recycled, to machinery, equipment, production and processing systems, to producers of semi-finished, cast and finished products in the sectors of diecasting, gravity and low pressure foundry, extrusion, rolling and moulding, up to machining, assembly, finishing and recycling technologies.**

METEF is an event created and shaped **in close collaboration with businesses and industry insiders**, and today, in a global context of heated competitiveness, it is revived by focusing on established expertise and experience of the industry segment.

The industry's **top national and international associations'** unwavering support helps refocus attention on the industry's development through an extraordinary cultural heritage that must tackle **the new frontiers of technology and sustainable innovation.**

METEF returns in **2025 together with MECSPE**, the most important event in Italy for the manufacturing industry, with an even richer proposal of **solutions for aluminium production, processing, and applications.**

Unique synergies are offered by the **METEF and MECSPE** events in their respective markets, **offering the international operator a complete and unmissable experience.**

The product sectors

RAW MATERIALS

- Primary aluminium producers
- Producers of recycled aluminium alloys
- Technologies and products for the primary and recycled aluminium industry
- Aluminium distributors and traders

DIE CASTING

- Die-cast products
- Machines, plants and systems
- Equipment and accessories
- Dies and deburring dies
- Steels for moulds and equipment
- Lubricants and release agents
- Furnaces
- Design and simulation software
- Instrumentation and quality control systems
- Automation systems
- Environmental control and safety

GRAVITY AND LOW PRESSURE FOUNDRY

- Casting manufacturers
- Gravity foundry plant, equipment, products and materials
- Low pressure casting systems
- Furnaces
- Design and simulation software
- Instrumentation and quality control systems
- Automation systems
- Environmental control and safety

The product sectors

EXTRUSION

- Extruded products
- Presses
- Dies
- Extruded-pieces Handling Machines
- Heat treatment and heating technologies
- Profile processing
- Sawing and cutting
- Instrumentation and quality control systems
- Packaging lines
- Storage and warehousing equipment and systems
- Design and simulation software
- Automation
- Environmental control and safety

ROLLING AND MOULDING

- Rolled and pressed products
- Hot and cold rolling technologies and equipment
- Production technologies for thin sheet metal and packaging systems
- Production technologies for stamped products
- Instrumentation and quality control systems

FINISHING AND PROCESSING

- Machinery, equipment, materials, products and accessories for surface and anticorrosive treatment technologies
- Polishing
- Anodising
- Galvanic treatments
- Chrome plating
- Coating
- Shot-peening
- Hard oxidation
- Electrolytic galvanising
- Heat treatment
- Anti-Wear coatings
- Metallization
- Joining systems and machining

RECYCLING

- Transport, logistics, storage
- Scrap packaging systems
- Sorting, selection and separation of scrap
- Size reduction and shredding
- Recycling furnaces
- Metrology, measurement and control equipment, laboratories
- Software
- Environmental control and safety
- Aluminium scrap traders

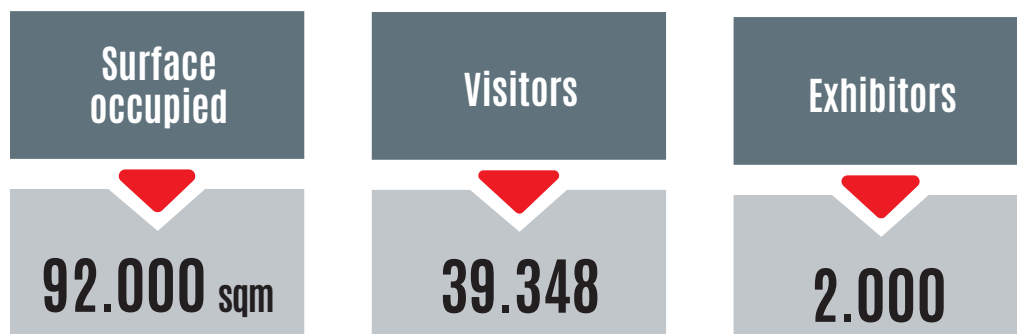

The exhibitor

THE BENEFITS FOR THE EXHIBITOR

- ▶ Forge business relationships with international buyer
- ▶ Propose innovative solutions in a context central to Italy's most important industrial districts
- ▶ Get wide visibility generated by the fair's intensive communication campaign on Italian and foreign trade magazines as well as national and local newspapers
- ▶ Have digital communication tools available to strengthen and promote their presence at the event
- ▶ Benefit from the synergy generated by MECSPE, Italy's benchmark exhibition dedicated to the manufacturing industry, which is held together with METEF

▶ THE NUMBERS OF A GREAT EVENT

(figures from METEF & MECSPE 2022)

The visitor

THE VALUE FOR THE VISITOR

Meet efficiently and effectively with all suppliers in the supply chain, with the opportunity to identify solutions to make their business segment more sustainable

Confront the latest developments in technological innovation and marketing, in an updated business context with emerging trends in the aluminum market

Amplify business opportunities by coinciding with MECOSPE, Italy's benchmark exhibition dedicated to the manufacturing industry

BUSINESS SECTORS COMPANIES:

- Aerospace
- Agriculture and earthmoving
- Food and Beverage
- Automation and Robotics
- Automotive
- Chemicals Pharmaceuticals Petrochemicals
- Machine building
- Construction
- Household Appliances
- Electromechanics
- Energy
- Railway
- Foundry
- Lighting
- Packaging
- Motorsport
- Nautical and naval
- Scrap production and marketing
- Technical study, planning and design
- Universities, ITS and other technical and scientific training institutions
- Electric vehicles
- Industrial and commercial vehicles

QUALITY PROFESSIONALS

- Owner
- Engineering
- Research & Development
- Production Department
- Technical Department
- Control and Quality
- Purchasing
- Sales / Marketing
- Energy Manager
- IT manager - Chief Digital Officer - Digital Manager
- Logistics
- Import Export Manager
- Teacher
- Journalist

Solutions for exhibiting

THE RANGE OF PROPOSALS FOR PARTICIPATION

The **stand** is the most **visible element** and must be designed according to your target and the corporate image you want to communicate.

The **function of the stand** varies depending on whether you want to just showcase products, demonstrate the use of machines and devices, or welcome your clients in a lounge and refreshment area.

TYPES OF EXHIBITION

RAW SPACE

Fit-out to be carried out by the exhibitor, starting from 24 sqm

STAND WITH BASIC FITTING

Area starting from 16 sqm - Mandatory fitting for stands measuring up to 24 sqm

This formula includes: area with 1 open side, fabric walls (h.3 metres), sign with company name, carpet, a table, 3 chairs, courtesy kit for hanging signs (4 hooks with wire) waste basket, coat hanger, power and lighting.

STAND WITH PRESTIGE FITTING

Area starting from 32 sqm

In addition to the advantages of the standard pre-fitted ones, this type of stand allows for great customisation with a vast selection of furnishings and colours.

This formula includes: area, fabric walls (h.4 metres), carpet (colours to be chosen from the range available), sign with company name, closet, reception desk with stools, furnishings and courtesy kit for hanging signs (4 hooks with wire).

START FORMULA 12 sqm

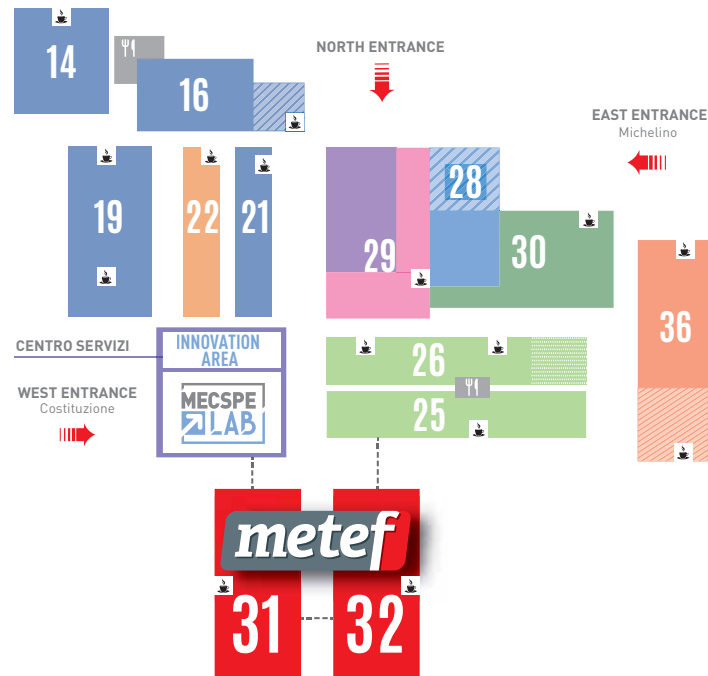

Reserved for first-timers only

Includes: area with 1 open side, fabric walls, sign with company name, carpet, table, chairs, courtesy kit for hanging signs (4 hooks with wire) waste basket, coat hanger, lighting and power, registration fee.

All stand images are purely indicative.

For costs information and personalised offers, please send an email to info@metef.com or call +39 030 9981045.

The exhibition centre

PAV.

14/16/19 MACHINES AND TOOLS	25/26 MECHANICAL SUBCONTRACTING	30 AUTOMATION AND ROBOTICS
16 MACHINES, MATERIALS AND PROCESSING OF SHEET METAL	26 NON-FERROUS MATERIALS AND ALLOYS	30 POWER DRIVE
21 DIGITAL FACTORY	28 ELETTRONICA ITALIA	31/32 METEF
22 TREATMENTS AND FINISHES	29 QUALITY & CONTROL	36 ADDITIVE MANUFACTURING
	29 LOGISTICS	36 PLASTICS, RUBBER AND COMPOSITES MACHINERY AND SUBCONTRACTING

METEF will take place within the Bolognafiere International Exhibition Center, which is central to the national manufacturing and metallurgical industry districts and home to the **MEC SPE** event that will run concurrently. The two events will be located in separate but adjoining halls to develop **synergies for the achievement of common goals**.

A strong alliance between two well-known and established events in their respective target markets, **complementarity and completeness of the product range offered**.

THE VALUE OF BOLOGNAFIERE

- Central position with respect to the most important industrial districts of Italy
- Strengthening connections and infrastructure
- Visitors potentially growing
- Improving international development
